

## Using the Rescue! Energy Vial

<http://www.rev.ehdef.com>

The Rescue! Energy Vial is an emergency kit to help in healing in emergency and acute situations. *Do not open this Rescue! Energy Vial.* Once opened the energy escapes and the vial becomes inert. As long as the vial is never opened or broken, *even if the water evaporates*, it can be used indefinitely.

Our NEW Rescue! Energy Pillow was added after we needed a way to get our granddaughter to place the Rescue! Energy Vial on her big toe when she squashed it. The Rescue Energy Vial is sewn inside the Rescue! Energy Pillow, helping protect the vial from breakage, protecting it from toddler mishaps and giving an air of magic to this comforting little pillow. The Rescue! Energy Pillow is \$ 30.00 (US) per pillow. You will receive random colors and designs. If you have any questions please contact Kat.

- Speed healing: Simply hold Rescue! near the area of injury (not necessarily touching the body, but within about an inch) to help reduce pain, swelling, inflammation and begin the healing process.
- Burns: Place the Rescue! over burn, wrapped within dressing or outside it.
- Fractures/Sprains: Place Rescue! inside splint/cast or place in wrap around injury site and leave there indefinitely to speed healing.
- Asthma, Anxiety, Stress: Hold Rescue! center of chest, close eyes and take three deep breaths in and out to help arrest asthma attack, or quell anxiety or stress attack (Stress and Anxiety formula – Canyon Dudleya and Fairy Lantern - of the Flower Energies vial is often more effective for Stress and Anxiety than is Rescue! however).
- Animals & Children: Hold Rescue! over injured area or near chest.
- Plants: Hold Rescue! near injured area for a few minutes, or place next to plant for a longer period if deep healing is needed.
