

Healing Cards Frequently Asked Questions

by Kat Miller

I want to know more about the Healing Card programs, how can I get a feel for them and what they do before I decide if I want to buy them?

The VBSE TOGETHER demo program is designed specifically to allow you to get a feel for the Vibrational Balancing, Sanjeevini Ease and VBSE TOGETHER programs. The demo program is available for free download at <http://www.hcdemo.ehdef.com> . This demo version of the VBSE TOGETHER program allows you to charge one combination in each program. It has within it only the cards from that combination.

In the VB program, it is VB52 Dullness that is available. To run that demo, once you have opened the demo program:

1. Click on the graphic for Vibrational Balancing (top). This will take you to the VB Opening Screen.
2. At the VB Opening Screen click on Files, then on Open Combination. You will then see one Combination (VB52 Dullness).
3. Open the VB52 Dullness Combination.
4. You should now be back at the Opening Screen and will see a list of the cards in the VB52 Combination.
5. Click on Charge Sample (top right on the screen). This will take you to the Charge Screen.
6. Place the water, pills, Energy Circle, Vibrational Balancing Image or even three fingers from your left hand near the center of the computer screen.
7. Click on Start to have the computer program begin the charge. You should then see each card in the Combination displayed on the screen for 15 seconds.
8. If for some reason you must leave the charge in the middle, you can press the Pause button, then press Start again when you return, and if you wish to charge additional samples of the same Combination, you can press ReStart once a charge has completed. All three of these buttons are in the same place and change according to what is happening on the screen.
8. As the cards are displayed in the top left corner of the screen you will see a bar showing current status.
9. Once the charge is complete the program will tell you "7 Items Finished" above the bar on the top left of the screen.
10. Click the Close button to return to the Opening Screen.
11. Click on the Switch button (top left part of screen) to switch between programs.

Follow the instructions above for seeing and charging Sanjeevinis with the Sanjeevini Ease program. The single Combination available in the Demo program for Sanjeevini is the SSC1 Sarva Shakthi Shanthi Combination.

Though in the demo program from the Opening Screen you can access the lists of Body Parts and Diseases cards in Sanjeevini Ease, and the Images list in Vibrational Balancing, the only images available to display are the ones in the individual Combination available in the demo program.

What is the difference between using a single card versus a combination of cards?

My experience has been that when you use a single card (like perhaps the Sanjeevini DS63 Hiccups card) you treat the symptom in the here and now, without necessarily getting down to the bottom, the core of it. This means that though it takes care of the problem now, you may see it come back over and over in the future, requiring you to use the card each time.

When using a combination of cards, you are addressing the support issues for the problem you are addressing. This means, for instance, instead of just taking care of the Hiccups you are experiencing now, if you take the time to run the Sanjeevini Hiccups Combination, which includes SSC16 Digestive Problems Combination along with the Hiccups card, you are getting more to the core and you may be preventing or decreasing future incidents of the problem.

--

I laminated my Multiplication and Broadcasting card to stop it getting wet. Unfortunately I was tired last night and spilled water over it and the water got inside the laminate and the images are now blurred.....is it still OK to use?

As long as it is not severely distorted it should be fine. Yes the energy is still there.

How do I use the program to charge images and Energy Circles?

The file VBI Instructions file at <http://www.hc.ehdef.com> has page-size Vibrational Balancing Images in it. Print the individual VBI you wish to charge with a Combination. Then use the program to charge the image with a Vibrational Balancing Combination and/or Sanjeevini Combination.

For example, if you are dealing with a toothache, you may wish to print the VB80 Toothache and then charge it with VBC179 TEETH AND GUMS REJUVENATION.

VBC179 includes the following VB cards:

- VB2 Addictive Habits
- VB21 Environmental Toxicity
- VB25 Feeling at Ease
- VB26 Feeling at Home in Your Body
- VB32 Hysteria
- VB34 Inner Strength
- VB47 Obstacles to Cure
- VB57 Pollution Protection
- VB60 Rejuvenation
- VB62 Resistance
- VB65 Skeptical
- VB71 Stimulating Your Healing Response
- VB76 Tension Release
- VB78 Tired Feet
- VB80 Toothache

Without the Vibrational Balancing or VBSE TOGETHER computer program, you would need to charge water with each of the paper images in this combination, then use the Replicate and Transmit card to copy it for dosing or sending remotely.

With the Vibrational Balancing or VBSE TOGETHER computer program, you could instead print the VB80, then charge it with the cards by placing it facing the images being displayed on the computer monitor in the Charge Screen. You could then charge water with the Combination by placing it on the charged image for a minimum of 30 seconds. You could also broadcast the combination to someone simply by writing their name inside the image (much like you do with Energy Circles and Switchwords).

Because we often stack many papers together, sometimes facing each other, with no intention of "charging" one image with another, trying to charge a paper VBI with a combination of paper VBIs or Sanjeevinis does not work. This is one of the advantages of the computer programs, besides automating the charge the computer programs open the ability to charge Energy Circles and Vibrational Images with Combinations.

Read more detailed information about charging images and Energy Circles with Healing Cards in the document *Charging Images with Combinations* at: <http://www.hc.ehdef.com>
